OBJECTIVE

Detail-oriented Information Technology undergraduate with hands-on experience in Python, Java, Machine Learning, and MERN stack. Skilled in building AI-driven applications, computer vision systems, and scalable web solutions, with exposure to SDLC, databases, and cloud fundamentals, and a strong problem-solving and continuous learning mindset.

EDUCATION

Chaitanya Bharathi Institute of Technology
Bachelor of Engineering in Information Technology,
GPA : 7.6/10.0

Dec 2021 – Aug 2025
Hyderabad

PROJECTS

PathFinder:An Interactive Game For Career Exploration | *Python, GPT-4o, MongoDB, NLP*

- Developed an interactive, game-based career guidance system that analyzes user skills and decisions to deliver personalized career recommendations.
- Leveraged GPT-4o (LLM) to generate dynamic scenarios and align user attributes with real-world roles using the O*NET dataset.
- Integrated Explainable AI (XAI) to provide transparent and interpretable career recommendations.

Student Attendance System using Haar Cascade Algorithm | *Python, Haar Cascade, Computer vision*

- Developed a real-time student attendance system using computer vision to automatically detect and recognize faces via webcam input.
- Implemented the Haar Cascade algorithm (OpenCV) for efficient face detection and student identification during attendance marking.
- Built a Tkinter-based GUI for student registration, image capture, and attendance management.

Event Management System Using MERN Stack | *Express.js, React.js, Node.js, MongoDB*

- Developed a full-stack web-based Event Management System using the MERN stack to streamline event creation, booking, and management.
- Implemented secure user authentication, role-based access for organizers and attendees, and CRUD operations for events and bookings.
- Implemented RESTful APIs, secure authentication, and MongoDB-based data storage.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, HTML, CSS

Frameworks: React, Node.js

Databases: MongoDB, MySQL

Developer Tools: Git, VS Code, MS Excel, AWS(Basics)

Concepts: OOPs, DBMS, Computer Networks, Machine Learning, SDLC

CERTIFICATIONS AND ACHIEVEMENTS

- Certified in Joy of Computing using Python from NPTEL(National Programme on Technology Enhanced learning)
- Certified in MERN Full stack development at CODEGNAN IT SOLUTIONS.
- IEEE Certification on Student Attendance System using Haar Cascade Algorithm.
- Springer Certification on PathFinder : An Interactive Game For Career Exploration
